

## RoHS Directive

**The restriction of the use of certain hazardous substances in electrical and electronic equipment**

ASC plans to be fully compliant with the European Union, Restriction of Hazardous Substances Directive (RoHS) by July 1<sup>st</sup> of 2006.

ASC is currently providing RoHS compliant capacitors to some customers but in order to sufficiently reduce existing inventory on raw materials ASC will still be providing some products containing hazardous substances until the July 1<sup>st</sup> deadline unless otherwise specified by the customer. **ASC is requesting that any customer requiring RoHS compliance on their products to put a note on any incoming orders so that we may properly identify these products and process accordingly.**

Due to our high level of custom-built products, some parts will not be able to meet the RoHS Directive and will be handled on a case-by-case basis. If there are questions as to whether or not your product will be able to meet the RoHS directive, please contact the factory.

This directive is a large step for the electronics industry and ASC is very excited to join the team of environmentally friendly companies providing RoHS compliant parts.

Any questions or concerns please contact the factory 1-308-284-3611 or email us at [sales@ascapacitor.com](mailto:sales@ascapacitor.com)
